MySQL Installer 8.0.34

!

Note: MySQL 8.0 is the final series with MySQL Installer. As of MySQL 8.1, use a MySQL product's MSI or Zip archive for installation. MySQL Server 8.1 and higher also bundle MySQL Configurator, a tool that helps configure MySQL Server.

Select Version:
8.0.34

Select Operating System:
Microsoft Windows

Windows (x86, 32-bit), MSI Installer	8.0.34	2.4M	Download

Installation Complete

Choosing a Setup Type

Please select the Setup Type that suits your use case.

☐ **Server only**
Installs only the MySQL Server product.

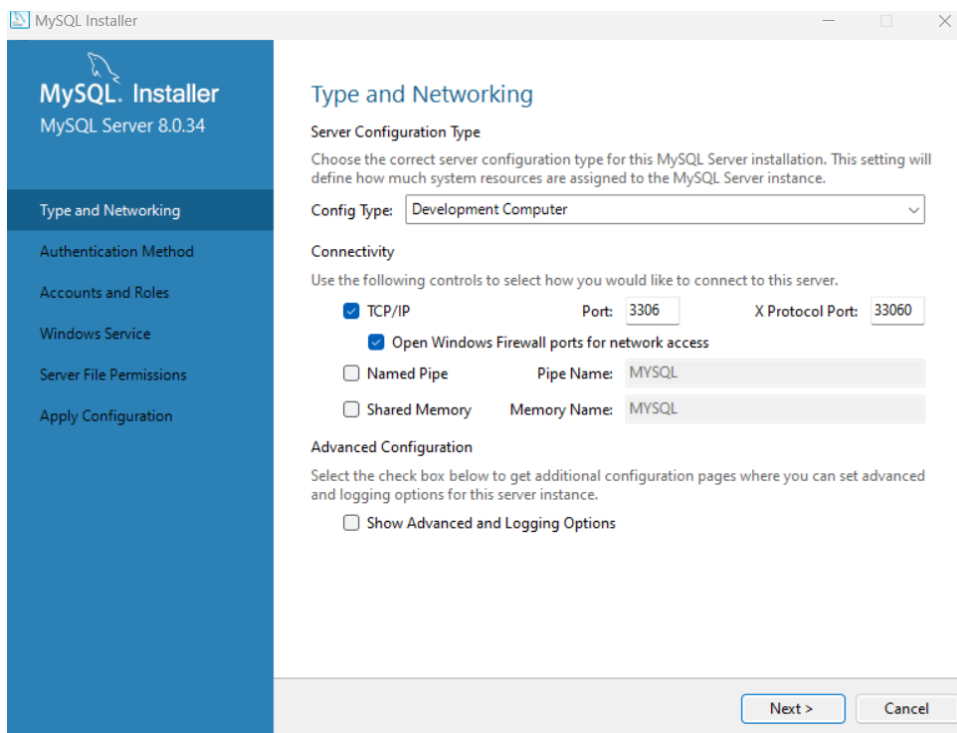

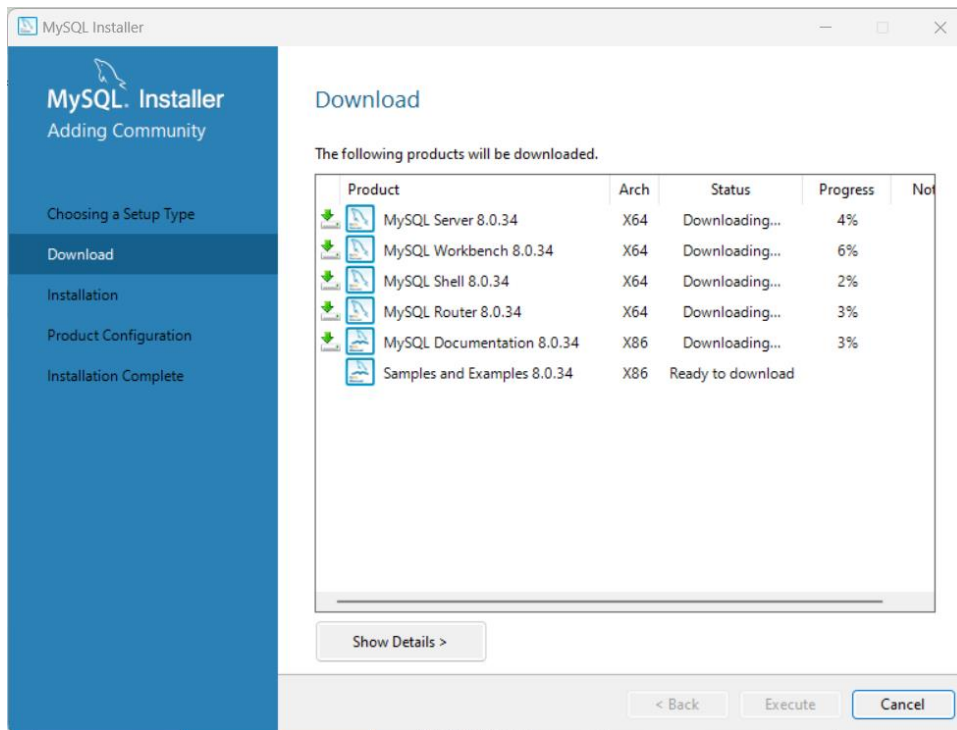

☐ **Client only**
Installs only the MySQL Client products, without a server.

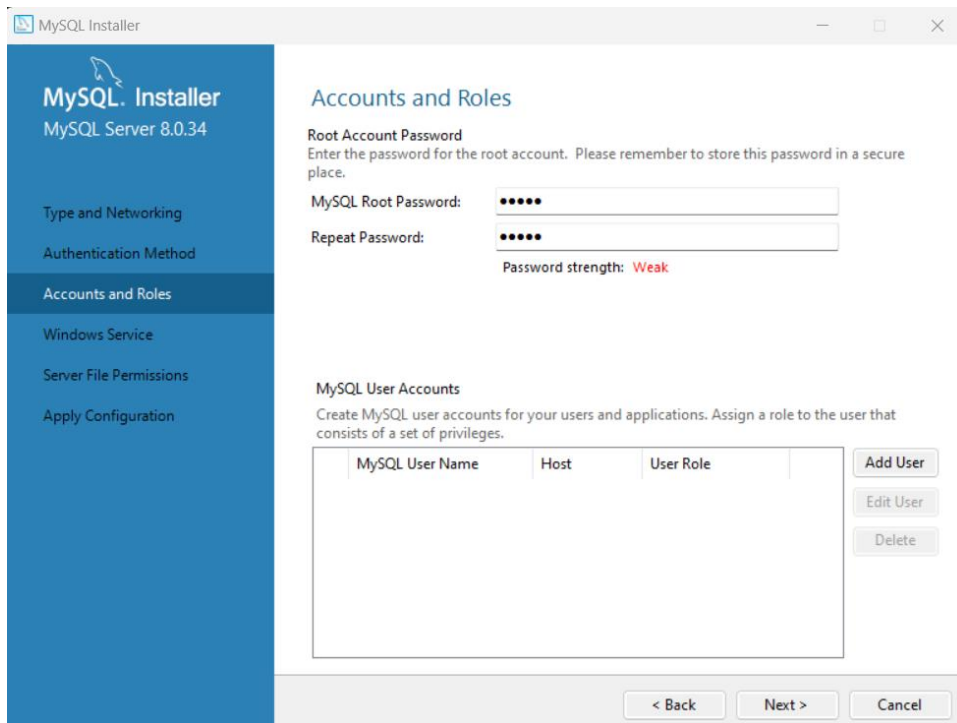

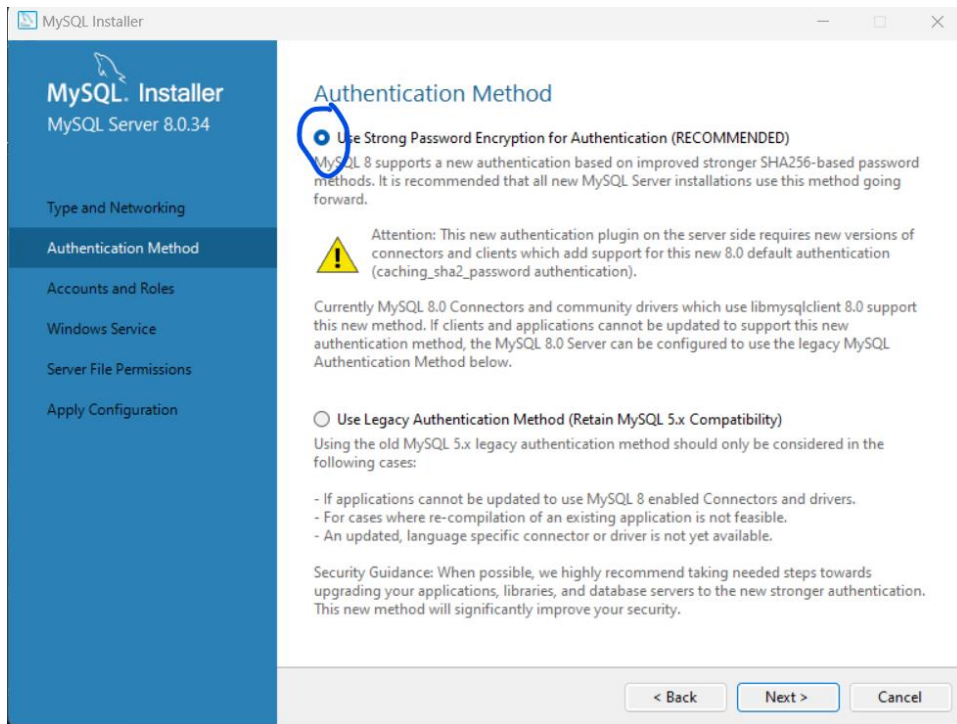

☒ **Full**
Installs all included MySQL products and features.

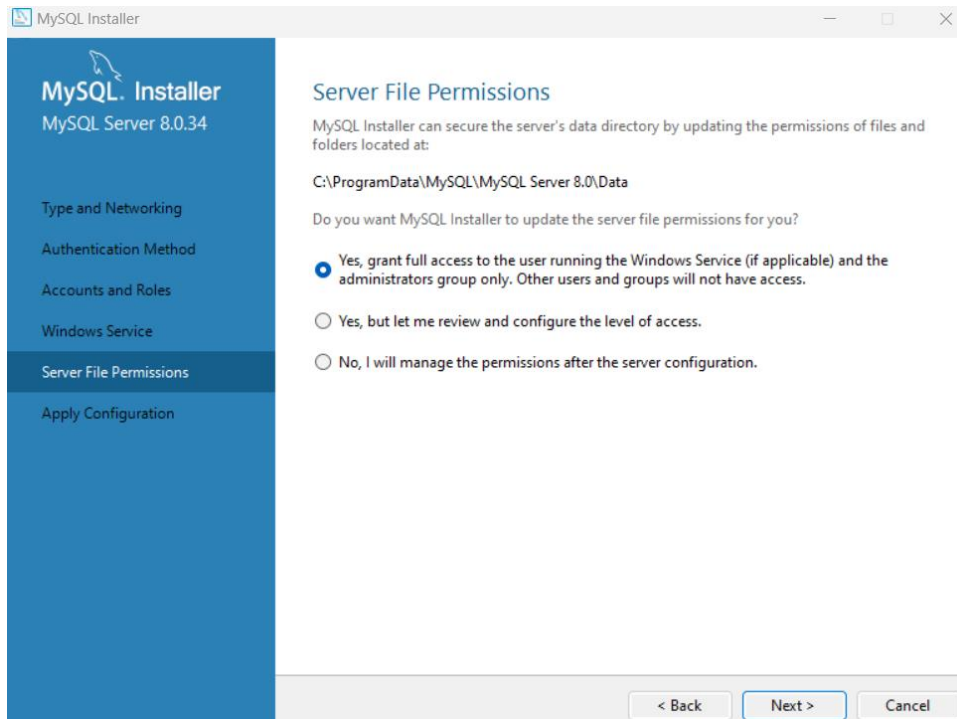

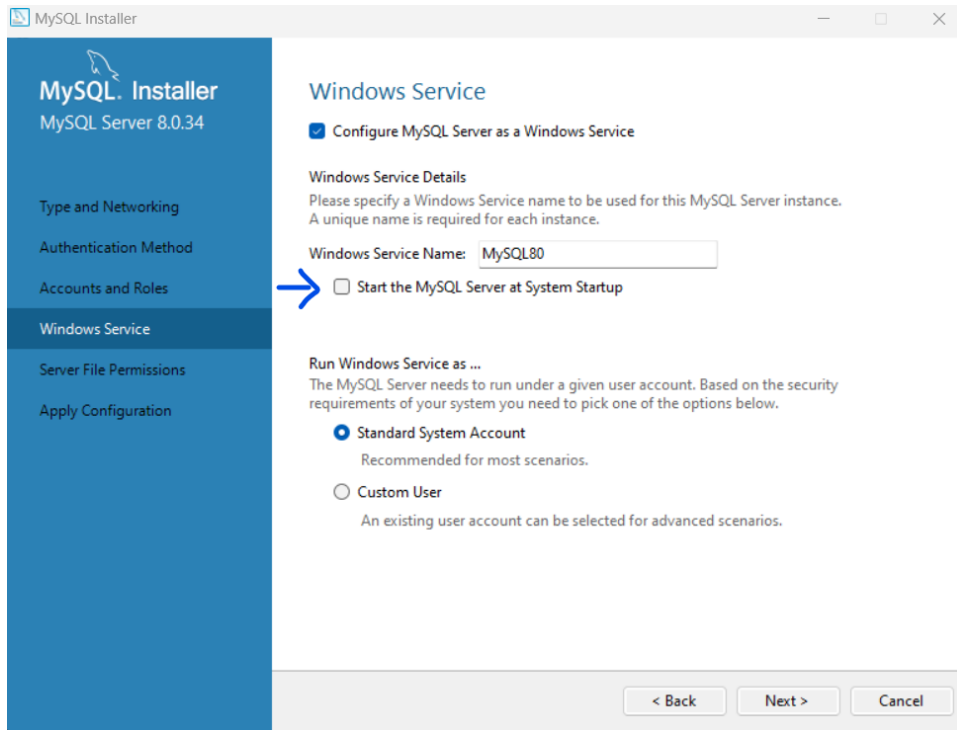

☐ **Custom**
Manually select the products that should be installed on the system.

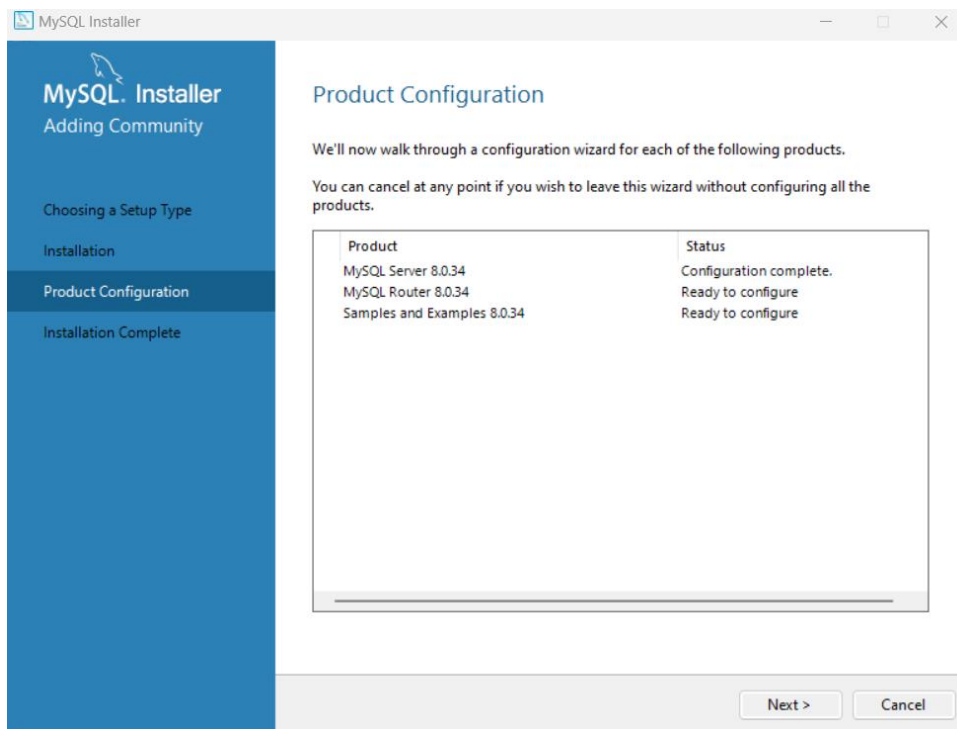

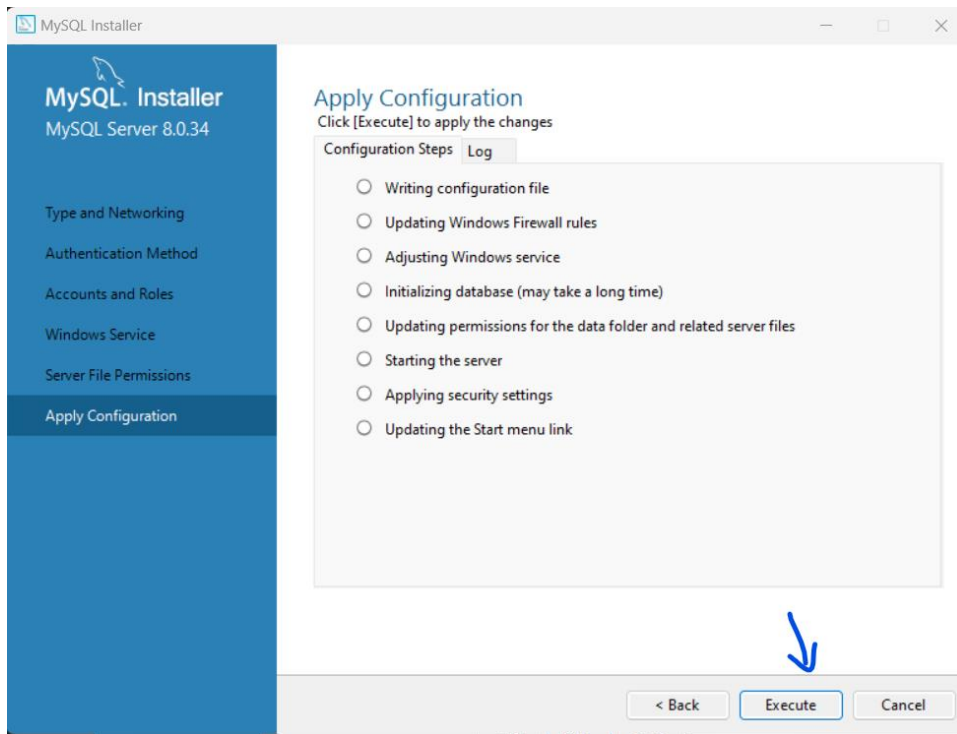

Setup Type Description
Installs all of the products available in this catalog including MySQL Server, MySQL Shell, MySQL Router, MySQL Workbench, documentation, samples and examples and more.

MySQL Installer

MySQL Router 8.0.34

MySQL Router Configuration

☐ Bootstrap MySQL Router for use with InnoDB Cluster

This wizard can bootstrap MySQL Router to direct traffic between MySQL applications and InnoDB Cluster. Applications that connect to the router will be automatically directed to an available read/write or read-only member of the cluster.

The bootstrapping process requires a connection to InnoDB Cluster. In order to register the MySQL Router for monitoring, use the current Read/Write instance of the cluster.

Hostname: 127.0.0.1
Port: 3306
Management User: root
Password: ••••• Test Connection

MySQL Router requires specification of a base port (between 80 and 65532). The first port is used for classic read/write connections. The other ports are computed sequentially after the first port. If any port is indicated to be in use, please change the base port.

Classic MySQL protocol connections to InnoDB Cluster:
Read/Write: 6446
Read Only: 6447

X Protocol connections to InnoDB Cluster:
Read/Write: 6448
Read Only: 6449

Next > Cancel

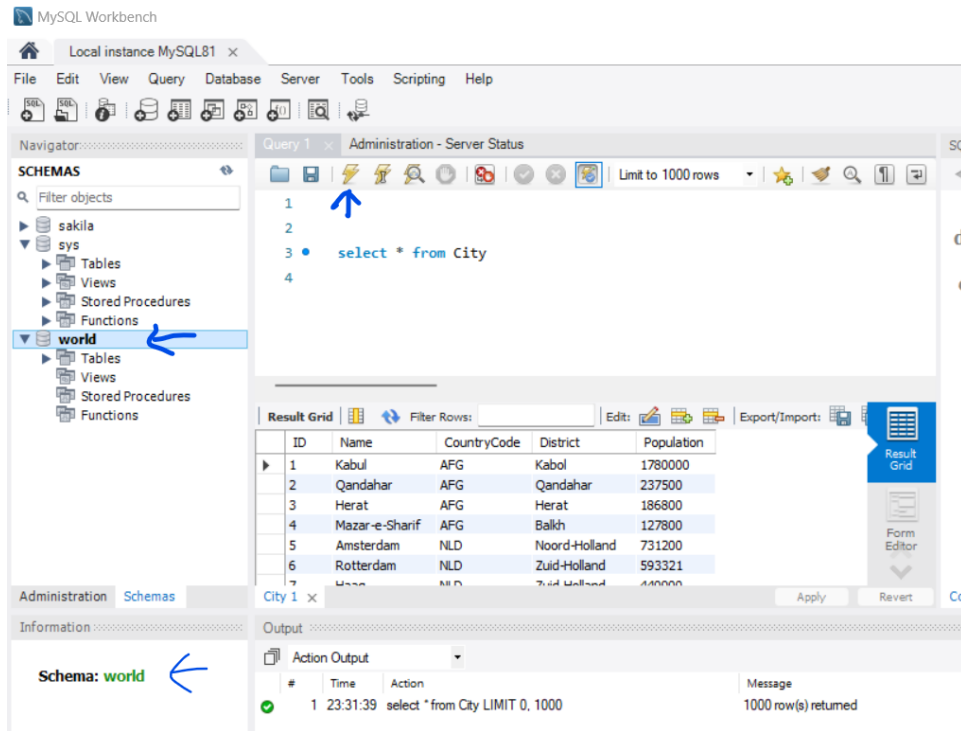

NOTE down the password for 'root' user as you will need it later!

Start workbench

From Start button, search for **MySQL 8.0 Command Line Client** and open it

Enter password for root (you set it up in one of the MySQL Server installation steps)

Issue command **show databases;** to list all databases available.

```
MySQL Select MySQL 8.0 Command Line Client
Enter password: *****
Welcome to the MySQL monitor.  Commands end with ; or \g.
Your MySQL connection id is 31
